Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The notification of the on-site audit at Walsh County Jail (WCJ) was posted on March 19, 2018, six weeks prior to the date of the onsite audit. The posting of the notices was verified by photographs received electronically from the facility's PREA Compliance Manager. The photographs indicated notices were posted in various locations throughout the facility including the housing and administrative areas. Approximately 6 to 8 weeks prior to the auditor's onsite visit to the facility, the auditor worked with the WCJ facility's PREA Compliance Manager, in developing and completing the Pre-Audit Questionnaire (PAQ). This document identified the minimum information and supporting documents that the facility should submit to the auditor before the onsite audit begins. The WCJ PAQ was received on April 17, 2018, and included policies, procedures and supporting documentation which was within an adequate timeframe for review. The initial review revealed well-organized documents. Any additional information needed was discussed with the facility PREA Compliance Manager and was received within a timely manner or ready for review onsite. Prior to the onsite visit, the auditor utilized the Auditor Compliance Tool. This tool was used during each phase of the PREA audit as a guide in making audit compliance determinations for each provision of every standard, including the evidence collected to assess compliance.

The on-site visit was conducted April 26, 2018 by the Correctional Management and Communication Group Inc. assigned Auditor, Dwight L. Fondren. Upon arrival at the facility, an in-briefing meeting was held with the Sheriff and the facility's PREA Compliance Manager to discuss the information contained in the PAQ. Site Review Instructions were reviewed describing the areas of the facility to be toured; operations and practices to be observed; and questions that should be asked of staff and inmates in order to conduct a thorough site review. Additionally, interview protocols to be used by the auditor to interview staff and inmates as part of the audit were discussed. Required documentation, relevant observations, the interview protocols, and the audit compliance tool were used to establish evidence of standard compliance. The on-site audit included a review of secondary documentation and interviews.

At the time of this audit, the facility employed seven county jail employees and six Officers from the Patrol Division and one Officer in Civil Process. The inmate population was 15 adult males. The administrative staff interviewed included the Sheriff and the Chief of Corrections. A total of five WCJ staff were interviewed; two correctional officers; one specialized staff, and two administrative staff. One randomly selected Sheriff Department staff and the County Nurse assigned to the facility was also interviewed. Correctional Officers on all shifts were interviewed. Staff interviews revealed that they had been trained on PREA standards and understand their responsibilities and duties to prevent, detect and respond to sexual abuse and sexual harassment. There were no volunteers or contract staff on site the day of the audit.

The Unity Medical Center (Hospital) in Grafton, North Dakota SANE/SAFE Nurse Station was contacted as well as a representative of the Domestic Violence and Abuse Center (DVAC) in Grafton, North Dakota to better understand the relationships and service provided to the Jail. Six inmates random inmate interviews were conducted. In addition, 6 inmates from the targeted groups were interviewed which included one with Limited English Proficient, two with Cognitive Disabilities, two inmate who identified as Gay; and one who disclosed sexual victimization during risk screening. No inmates refused. During this process the auditor did not limit the interview questions to only those included in the protocols; rather, additional site specific

questions were asked to use as a starting point for eliciting information about the facility's compliance with the PREA Standards. All responses to the interview questions were part of the auditor's compliance assessment. There are no on-site medical providers at the center. Inmates interviewed supported staff's compliance with the facility's prohibition of cross-gender viewing and pat searches. This auditor was provided evidence to ensure compliance to the PREA, as documented in this report.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

The WCJ is under the authority of the Walsh County Board of Commissioners. The facility is required to follow the North Dakota Department of Corrections and Rehabilitation (DOCR) rules and policies. The mission of the Walsh County Sheriff's Department and Correctional Facility is to serve and protect the people and property in Walsh County, along with housing and supervision of incarcerated inmates

The WCJ is a 21-bed facility located in Grafton, North Dakota, approximately 40 miles north of Grand Forks, North Dakota. The facility houses minimum, medium and maximum custody male inmates for up to 90 days, or until an inmate's court case is completed. The average length of stay is 15 days, and 313 inmates were admitted to the facility in calendar-year 2017. The facility contains four housing units; three with two beds and one with 10 beds. Portable cots are utilized when additional bed space is needed. The facility also has two areas, Recovery and Holding, for multi-purpose Special Housing such as medical observation, suicide watch, and segregation. The facility is contained in one building. All housing units have three toilets, with the exception of Special Housing, day rooms and shower areas. Special Housing inmates are provided showers and day room activities as warranted by escorting the inmates to one of the housing units after those unit inmates are moved to a separate area.

There are 21 cameras throughout the facility. A "block out" program was installed to prevent direct view of inmates in showers or using the toilets. Direct observation revealed, no cameras appeared to capture inmates in the showers or using the toilets and no blind spots were noted. The facility is considered a "Grade 2" facility by the North Dakota Department of OCR standards and therefore is not required to provide separate recreation areas, education or programs. Food is prepared by contract staff, delivered to the facility and taken to the housing units by the Correctional Officers. The facility had a count of 15 inmates during the on-site audit. Only male inmates were housed at the facility during the onsite audit. The facility has six Correctional Officers, a Chief Correctional Officer, and the Jail Administrator/Sheriff for a total of eight staff. There are no contract staff who have contact with the inmates.

- Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The WCJ has a basic staffing plan that includes a review of all elements of the standard. The yearly analysis was completed for 2017. Documentation was provided reflecting an analysis which concludes the jail has adequate staffing, video monitoring equipment and resources to comply with PREA and keep inmates safe from sexual abuse and sexual harassment. The facility documents all instances of non-compliance with the staffing plan and justifies the action taken to ensure protection of the inmates from sexual assault, which is primarily done by hiring staff on overtime.

During the facility tour cameras were observed in sufficient number and location. Areas of possible blind spots were viewed from the control center (the main area where the cameras are monitored) where the auditor was able to determine adequate camera coverage exists for all areas. Institution policy requires the Chief Correctional Officer, Sheriff, and Chief Deputy Sheriff to make rounds of the facility. The Sheriff provided documentation to verify that intermediate-level or higher-level supervisors conduct and document unannounced rounds, to identify and deter staff sexual abuse and sexual harassment.

Auditor Overall Compliance Determination

- Exceeds Standard** (*Substantially exceeds requirement of standards*)

- Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)

- Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The WCJ's PREA policy states females will not conduct cross-gender pat searches of male inmates and also prohibits cross-gender strip searches and cross-gender body cavity searches (meaning searches of the anal or genital opening), except in exigent circumstances and then the searches are to be documented. The jail currently has two female Correctional Officers and no vacancies to hire additional staff at this time. The jail's plan for when the female inmates are temporarily brought to the facility is to call a female staff member in whenever there is a need to search, obtain a urinalysis, or other circumstance with a female inmate requiring the presence of a female staff member. Interviews with staff reveal an understanding about the Order of Non-Compliance by the North Dakota DOCR, as well as PREA standards, and staff assures only female staff will pat and strip search female inmates if required. Both male and female staff pat search male inmates.

Observations during the tour of the facility and interviews with inmates revealed they are able to shower, change clothing and perform other bodily functions without non-medical staff of the opposite gender viewing their breasts, buttocks, or genitalia outside of incidental incidents due to routine cell checks. During the on-site audit, the auditor observed a female staff announcing her presence upon entering the housing units. Facility policy prohibits searching or physically examining transgender or intersex inmates for the sole purpose of determining the inmate's genital status. As a result of recommendations from the previous PREA Audit, a revised lesson plan with specific instructions on searching transgender/intersex inmates was developed and documentation of all staff being trained on the new procedures was provided.

The WCJ's PREA policy requires all inmates be screened for risk of being sexually abused or sexually abusive within 24 hours of admission to the facility. Interviews with staff and inmates, along with a review of inmate intake forms, confirmed the screenings are being conducted and all areas required by the standard are considered. An active reassessment of all inmates is conducted by the Chief Correctional Officer within 30 days of arrival, as well as if warranted by referral, request or incident.

The WCJ uses the screening information regarding an inmate's risk of being sexually abused or sexually abusive in making housing decisions. The jail is considered a Grade 2 facility by North Dakota standards meaning its average length of stay for inmates is 90 days or less. As a Grade 2 facility, they are not required to provide programming or recreational facilities. The jail's PREA policy requires transgender or intersex inmates be reassessed at least twice a year to review any threats to safety experienced by the inmate; however it is unlikely such an inmate would be at the facility long enough to warrant the reassessments. The policy also allows transgender/intersex inmates to shower separately if requested. Interviews with staff confirmed their knowledge of the use of screening information in making housing decisions.

The WCJ's PREA policy lists steps first responders are to take upon learning of an allegation of sexual abuse. Interviews with staff confirmed their knowledge of the first responder steps to take in the event of an incident of sexual abuse. Staff interviewed informed this auditor that, upon learning of an allegation that an inmate was sexually abused, the first security staff member to respond is required to separate the alleged victim and abuser; preserve and protect any crime scene until appropriate steps can be taken to collect any evidence. They must ensure that the alleged abuser does not take any actions that could destroy physical evidence, including, as appropriate, washing, brushing teeth, changing clothes, urinating, defecating, smoking, drinking, or eating, if the abuse occurred within a time period that still allows for the collection of physical evidence. If the first staff responder is not a security staff member, the responder is required to request that the alleged victim not take any actions that could destroy physical evidence, and then notify security staff.

The WCJ's PREA policy has clear language on coordinated response to instances of sexual abuse. The fact the facility has only seven staff with the Sheriff as the Jail Administrator lends to a clear chain of command since all duties fall on the Correctional Officers and their supervisor. Additionally, staff interviews confirm staff are clear as to first responder actions to take, notifying the correctional supervisor, preserving the evidence, and taking the victim to local Hospital for examination. Mock scenarios are conducted to further assist in the training of staff.
